Please find below and/or attached an Office communication concerning this application or proceeding.

Office Action Summary

Application No.

09/768,073

Applicant(s)

SAUBER, WILLIAM FREDERICK

Examiner

Hau H Nguyen

Art Unit

2676

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 03 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 05 May 0204.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-21 is/are pending in the application.
- 4a) Of the above claim(s) 2-5,7-8,11-14,16-17,19-20 is/are withdrawn from consideration.
- 5) ☐ Claim(s) _____ is/are allowed.
- 6) ☒ Claim(s) 1,6,9,10,15,18,21 is/are rejected.
- 7) ☐ Claim(s) _____ is/are objected to.
- 8) ☐ Claim(s) _____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on _____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
- a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
2. ☐ Certified copies of the priority documents have been received in Application No. _____.
3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Attachment(s)

- 1) ☐ Notice of References Cited (PTO-892)
- 2) ☐ Notice of Draftsperson's Patent Drawing Review (PTO-948)
- 3) ☐ Information Disclosure Statement(s) (PTO-1449 or PTO/SB/08)
Paper No(s)/Mail Date _____.
- 4) ☐ Interview Summary (PTO-413)
Paper No(s)/Mail Date. _____.
- 5) ☐ Notice of Informal Patent Application (PTO-152)
- 6) ☐ Other: _____.

Response to Amendment

1. Applicant's arguments with respect to claims 1, 6, 9, 10, 15, 18, and 21 have been considered but are moot in view of the new grounds of rejection.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claim 15 recites the limitation "the first display device", "the first signal", "the second signal". There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 1, 6, 9, 10, 15, 18, and 21 are rejected under 35 U.S.C. 103(a) as being unpatentable over admitted prior art in view of Zenda (U.S. Patent No. 5,559,525).

Referring to claims 1, 6, 9, 10, 18, and 21, as shown in Fig. 1 and described on page 1, lines 20-23, and page 2, lines 1-2 of the specification, admitted prior art teach a processor 110 is coupled to a chipset 120 that includes a bus input/output (I/O) controller 122, a memory controller 124, and an integrated video controller 126. A system memory 130 is coupled to

Art Unit: 2676

chipset 120. An optional video controller 140 and a memory 142 are also included in computer system 100. Video controller 140 is coupled to chipset 120 using a port 144 such as an AGP port.

Thus, admitted prior art teach all the limitation of claims 1, 10, and 21, except for a switching device configured to receive analog and digital signals from the video controllers and provide the signals to a compatible display device.

However, Zenda teach a portable computer having a first graphics subsystem for outputting data to be displayed and a flat panel display unit means for displaying the data supplied from the first graphics subsystem; a second graphics subsystem to be externally connected to the portable computer, for supplying data to be displayed on the flat panel display unit means, to the portable computer; connectors for connecting the second graphics subsystem to the portable computer (col. 2, lines 64-67, and col. 3, lines 1-8). With reference to Fig. 3A, Zenda teaches the first display controller 87 and the RAMDAC 93 constitute a first graphics subsystem (built-in graphics subsystem) (chipset) (see col. 8, lines 12-14). As shown in Fig. 3A, an LCD display board comprising a second display controller 109 is connected to the chipset. The system further comprises a first display device 91, and a second display device 107. Zenda further teaches the selector 113 (a switching device) is connected to the first display controller 87 by the feature connector 103, and to the color LCD controller 95 by the Z connector 105. As illustrated in FIG. 7, the selector 113, in response to the changeover signal 115 supplied from the second display controller 109, selects (1) either the digital color data supplied from the RAMDAC 111 or the digital color data supplied from the second display controller 109, (2) either the analog video signals supplied from the RAMDAC 111 or the analog video signals

Art Unit: 2676

from the second display controller 109, and (3) either the control signals coming from the first display controller 87 or the control signals transmitted from the second display controller 109. The selector 113 outputs the selected digital color data and analog video signals (col. 9, lines 27-40) (please see also column 13, lines 15-21). Thus, selector 113 receives both analog and digital signals and provides to a compatible display device.

Therefore, it would have been obvious to one skilled in the art to utilize the switching device as taught by Zenda in combination with admitted prior art in order to selectively display, on a flat panel display unit, image data from a standard graphics subsystem or an optional graphics subsystem (col. 2, lines 47-50).

In regard to claim 15, as applied to claim 10, admitted prior art teach all the limitations of claim 15, except for a program causing the switching device to provide a first signal from the first video controller to the display device, and causing the switching device to provide the second signal from the second video controller to the display device in response to the second video controller being coupled to the interface.

However, Zenda teach when second graphics subsystem is not connected to the portable computer, the color LCD controller 95 displays the image defined from the first graphics subsystem on the color LCD panel 91 (col. 12, lines 17-36). Zenda further teach when the second graphics subsystem is connected to the computer system, in case where the changeover signal 115 indicates selection of the signals from the second display controller 109, the selector 113 selects the digital color data, the analog video signals and the control signals from the second display controller 109 (col. 13, lines 13-30).

Art Unit: 2676

Conclusion

6. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a).

Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

7. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Hau H. Nguyen whose telephone number is: 703-305-4104. The examiner can normally be reached on MON-FRI from 8:30-5:30.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Matthew Bella can be reached on 703-308-6829.

Any response to this action should be mailed to:

Commissioner of Patents and Trademarks

Washington, D. C. 20231

or faxed to:

Art Unit: 2676

(703) 872-9314 (for Technology Center 2600 only)

Hand-delivered response should be brought to Crystal Park II, 2121 Crystal Drive,
Arlington, VA, Sixth floor (Receptionist).

Any inquiry of a general nature or relating to the status of this application or proceeding
should be directed to the Technology Center 2600 Customer Service Office whose
telephone number is (703) 306-0377.
